The plan above is a suggested guide to ensure that all Core Curriculum, College, University, and Major requirements are met within 4 years of study. Students may deviate from the suggested placement of Core Curriculum courses.

Students cannot earn an undergrad degree under this track unless they are admitted into the 4+1 program. Therefore, students should follow an undergrad track of the Bachelor of Science in Health Sciences until admitted into the 4+1 program. This may require additional sciences and social sciences. Consult with an academic advisor to discuss degree requirements.

*Electives ensure that a student accumulates the minimum credit hour totals needed for graduation with an undergraduate degree. Students must have a **minimum of 120 total credit hours**, of which a **minimum of 24 credit hours** must be upper division (300, 400, and 500-level courses if in the 4+1 program) to earn a Bachelor of Science. Depending upon other elective choices made, students may not need as many electives as indicated above, or may need additional electives.

[^]Area of Emphasis Elective at the graduate level must be chose from the following: HSC 510, 513, 523, 533

^{^^}4+1 Students must consult with program faculty for a list of approved electives
